PROFESSIONAL SUMMARY

Frontend Engineer with 3+ years of experience building and maintaining production-scale web and mobile applications using React, React Native, and TypeScript.

Specialized in handling complex UI state, navigation flows, and cross-platform behavior consistency. Strong expertise in debugging production issues across frontend, backend APIs, and microservices systems.

Proven ability to improve application stability, optimize rendering performance, and deliver reliable user experiences in large-scale systems.

EDUCATION

Bachelor's Degree in Information Technology

Nha Trang University | 2019 – 2023

TECHNICAL SKILLS

- Frontend:
 - ReactJS, NextJS, React Native, TypeScript
 - Advanced state management (Redux, Zustand)
 - UI performance optimization, rendering control
- Backend:

- Node.js, NestJS
 - REST API integration
 - PostgreSQL
- System & Practices:
 - Microservices integration
 - Debugging production systems
 - Git, GitLab CI/CD
 - Monorepo architecture
 - Agile / Scrum collaboration
- Language:
 - English: Working proficiency (technical communication)

WORK EXPERIENCE

Full Stack Developer

Yara Africa & Asia (Singapore) | 04/2025 - 03/2026

Worked on Yara FarmCare, a large-scale digital platform supporting farmers across multiple markets, including both web and mobile applications.

Key Contributions:

- Owned and delivered multiple frontend features end-to-end, from requirement clarification to production release.
- Built and maintained cross-platform features using React, React Native, and TypeScript, ensuring consistent behavior across web and mobile.
- Designed and stabilized deep linking flows, improving post-login navigation reliability and reducing user drop-off.
- Diagnosed and resolved complex UI state and navigation issues in large-scale applications.
- Investigated cross-layer issues involving frontend state, backend APIs, and microservices communication.

- Collaborated closely with product and backend teams to clarify business logic and edge cases.

Impact:

- Improved application stability and reduced navigation-related production issues.
- Increased reliability of deep linking and authentication flows across platforms.
- Reduced time-to-fix for production bugs through systematic debugging approaches.

Frontend Developer

ABC Digital | 08/2022 - 03/2026

- Developed scalable frontend applications using React, TypeScript, and Redux.
- Managed complex UI state and asynchronous data flows in real-world applications.
- Integrated RESTful APIs and ensured data consistency across multiple systems.
- Worked in a monorepo architecture sharing reusable components and business logic.
- Contributed to CI/CD pipelines and automated deployment workflows.
- Collaborated with cross-functional teams to deliver production-ready features.

Projects:

- OdiDi Travel
- Kobai
- CWO 3D Website
- OpenSpaces Website
- Quizne.vn
- Yen Sao Khanh Hoa Website
- Internal enterprise system
